📁 Portfolio

Professional Summary

Data Analyst skilled in **Python, SQL, Power BI, and Tableau**, with a track record of improving process efficiency by **40%**, cutting time-to-hire by **17%**, and automating pipelines across 5+ data sources. Published IEEE researcher driven by turning complex data into actionable business decisions.

Technical Skills

Languages & Querying:	Python (pandas, NumPy, Matplotlib, Seaborn), SQL (MySQL, PostgreSQL), C++, Java
Data & BI Tools:	Power BI, Tableau, MS Excel (Advanced), Jupyter Notebook, ETL, Data Warehousing
Databases:	MySQL, MongoDB
Core Competencies:	EDA, Data Cleaning, Dashboard Design, Pipeline Engineering, KPI Tracking
Other:	Git, AWS, DAX Function, Data Structures & Algorithms, Statistical Analysis

Professional Experience

Data Analytics Trainee

Jul 2025 – Dec 2025

Trainity

Remote, India

- Analyzed **50,000+** data points using Python (pandas, NumPy) and Excel, driving a **15% year-over-year improvement** in process efficiency for project stakeholders.
- Consolidated disparate data sources and automated preprocessing workflows via Python scripting, shortening reporting cycles and increasing deliverable reliability for cross-functional teams.
- Engineered SQL queries and automated scripts for weekly data retrieval and cleansing, improving **data accuracy by 18%** and reducing manual processing time by **6 hours/week**.
- Optimized a data pipeline using Python Pandas to merge, transform, and validate datasets from **5+ sources weekly**, cutting data wrangling time by **40%** and accelerating BI delivery speed.

Projects

Global Data Job Market Analysis | [GitHub](#)

Jan 2026 – Mar 2026

- Aggregated and analyzed job market data from **50+ countries** using Python and SQL, enabling a Fortune 500 client to prioritize hiring in high-growth regions and achieve a **17% reduction in time-to-hire**.
- Engineered a scalable data pipeline processing **5M+ global job postings/month**; built Power BI dashboards that accelerated market intelligence reporting by **35%** for enterprise workforce planning.

Operational Analytics & Investigating Metric Spikes | [GitHub](#)

Jul 2025 – Nov 2025

- Designed SQL-based frameworks on large operational datasets to track mission-critical KPIs (throughput, user engagement, retention), enabling data-informed operational optimizations.
- Analyzed data for **50+ business processes** using SQL, Power BI, and Python, uncovering patterns that drove a **25% improvement in workflow efficiency** for 20 stakeholders.

Instagram User Analytics | [GitHub](#)

Jul 2025 – Nov 2025

- Built advanced SQL queries (JOINS, aggregations, subqueries, date functions) to analyze user behavior, surfacing actionable marketing insights and investor-ready metrics.

Education

Bachelor of Engineering (B.E.)

2022 – Present

Chandigarh University, Punjab

CGPA: 8.1 / 10

Research & Publications

- Multimodal Temporal Modeling of YouTube Trends Using Metadata and Natural Language** — *IEEE Research Paper, IC2SDT 2025* (2025)
- Reshaping Language and Cognition in Education through AI** — *Book Chapter, IGI Global Publication* (2026)

Certifications

Programming for Everybody – Python (Coursera) • SQL: Introduction for Querying Databases • Business Analysis: Process Modeling (Coursera) • AWS Cloud Solution Architect
